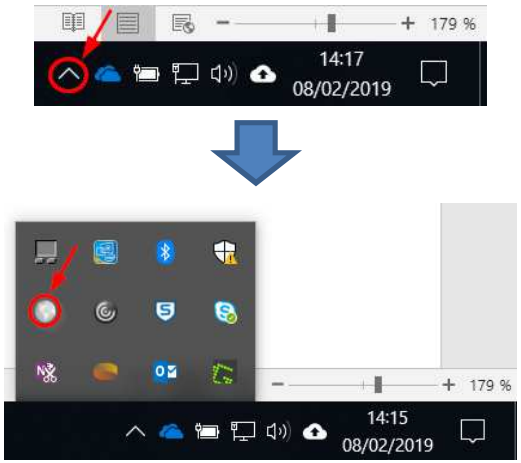
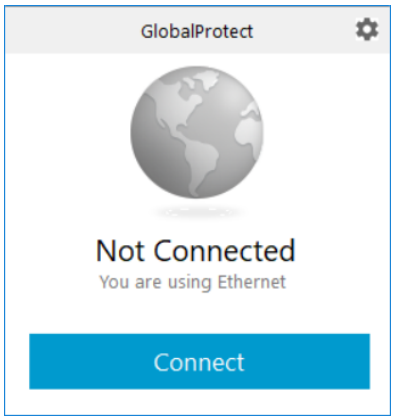
CONNECTING TO VPN WITH THE GLOBAL PROTECT CLIENT

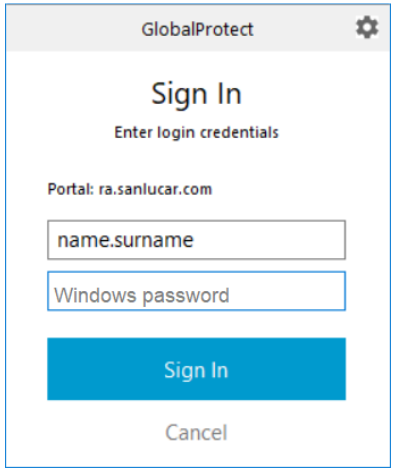
1. You will find the GlobalProtect client in the task bar. Click on show hidden icons. Hovering your mouse over the GlobalProtect Icon will show your VPN connection status, which will be *Disconnected* after your initial installation.

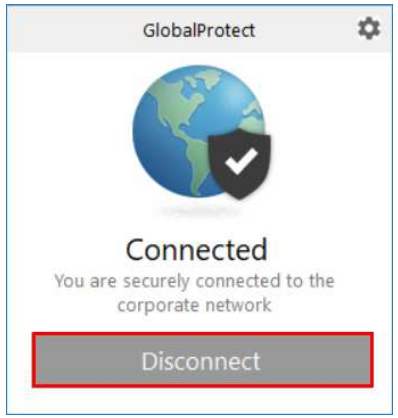


2. Right-click on the GlobalProtect icon to open the program.



3. It should take your login credentials and portal information, but if not, it will ask when you click Connect





4. If you no longer need remote access, right click on the GlobalProtect icon and click Disconnect:
